

SKILLBRIDGE

· AI HACKATHON

BRIDGE YOUR NEXT CHAPTER

Bridge your skills. Discover your opportunities.

AI-powered opportunities built around what you can do.

AI SKILL MATCH

STUDENTS + PROS

HIRING PIPELINE

Team · Hackathon 2026

Talent and opportunity keep missing each other.

Generic listings

Students scroll past hundreds of roles they don't fit.

Relevance is buried inside filters that need a resume they don't have yet.

Skills go invisible

Freelancers and skilled professionals waste hours proving what a

2-line search bar cannot see — projects, side wins, portfolios.

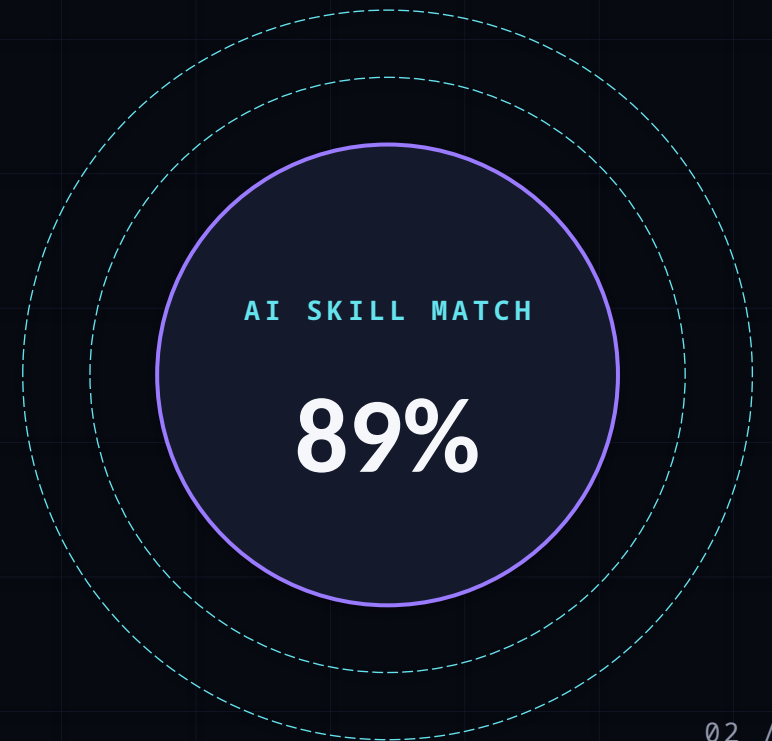

Hiring is fragmented

Owners of internships and freelance briefs juggle inboxes, forms and spreadsheets — no clean pipeline from applicant to shortlist.

One AI-powered bridge. Both sides of the market.

SKILLBRIDGE learns what a person can actually do — skills, interests, portfolio, past applications — and matches them to the opportunities where they will meaningfully show up.

For students it removes the noise. For professionals it surfaces work worth their craft. For owners it turns an inbox into a pipeline.

Everything you need for a full two-sided demo.

● Role Selection

Student / Skilled Professional flow with tailored onboarding.

● AI Skill Match

Deterministic overlap scoring • Home + Dashboard + Skill Match page.

● Personalised Feed

Opportunities ranked by user skills, interests and goals.

● Application Flow

Multi-step Apply • Resume • Cover letter • Instant success.

● Applicant Pipeline

Owners review applicants, move Applied → Shortlisted → Selected.

● Portfolio Uploads

PDF / images via Emergent Object Storage — served through API.

● Notification Bell

Live popover • Unread dot • Mark-all-read • Deep link inbox.

● Real Reset Email

Resend integration • Branded HTML • Sandbox-aware fallback.

Deterministic, explainable, fast enough to feel magical.

Same input → same score. No black-box tricks.

- Overlap ratio between user skills and role skills
- +10 pt bonus when 2+ skills align (signal, not luck)
- Boosts for interest + goal alignment
- Clamped 38 – 99 so no score feels fake

Every match on Home, Dashboard and Detail is computed live from the user's profile. Edit a skill → the whole app re-personalises.

AI SKILL MATCH

89%

A full loop in under two minutes.

STUDENT · AARAV

- 1 Role selection · Continue as Student
- 2 Demo access · Onboarding (skills, interests, goal)
- 3 Home shows personalised match + top 3 opportunities
- 4 Open Frontend Dev Intern · Apply flow · Submit
- 5 Application appears in My Applications instantly

PROFESSIONAL · MAYA (OWNER)

- 1 Enter demo as Skilled Professional
- 2 Tune profile · Upload portfolio PDF to storage
- 3 Workspace shows 7 owned opportunities with counts
- 4 Review Applicants · See Aarav ranked by match score
- 5 Move to Shortlisted → Aarav gets a live notification

Small stack. Big product.

FRONTEND

React 19 + React Router
Context-driven dynamic data
Deterministic match (mirror)
Skeletons + empty states
Tailwind-free custom CSS

BACKEND

FastAPI + Motor (async)
MongoDB collections:
· users · opportunities
· applications · saved
· notifications · portfolio
Seeded opportunities on startup

INTEGRATIONS

Resend — real reset email
Emergent Object Storage —
portfolio uploads (PDF / img)
Pydantic v2 payload models
CORS + supervisor-managed

18

Pytest cases pass

10

Seeded opportunities

6

Application statuses

0

Console errors

Real, working, live.

HOME · MATCH

Dynamic score · strongest skill · next skill
Personalised top 3 opportunities

APPLY FLOW

4 steps · resume upload · cover letter
Success screen · applications updates live

APPLICANT PIPELINE

Ranked by match · portfolio link
Status buttons write to DB + notify user

NOTIFICATION BELL

Popover · unread dot · mark-all-read
Status changes appear in real time

Not another job board.

1 Personalisation everywhere

Match score isn't hidden on one page — it drives Home, Dashboard, Skill Match, Detail and Applicant ranking. One user, one story.

2 Both sides, one product

Students ship applications and pros ship shortlists in the same app. Every action on one side creates a signal on the other.

3 Judges can break it

Change your skills → the app re-personalises live. Upload a real PDF → owners see it in the pipeline. Move a status → applicant is notified.

4 Production-lean

10 seeded opportunities, deterministic match, real object storage, real email API, 18 backend tests, 0 console errors.

From hackathon to platform.

NOW

- Two-sided demo ready
- Real object storage + email
- Deterministic AI match
- Full application pipeline

NEXT 4 WEEKS

- Session-based auth + Google OAuth
- Verified sender domain for Resend
- Recruiter messaging inline
- Public shareable profile URL

NEXT 6 MONTHS

- Interview scheduler
- Skill assessments (auto-verified)
- Team dashboards for colleges
- Freelance escrow (Stripe)
